More than 10GW under active development and more than 10GWh of Energy Storage Solutions

Mapping Our Success

With over a decade of experience, 174 Power Global offers customized solar-installation solutions, completed on time and without interrupting operations. We have a focus for commercial and industrial experience in the Northeast area featuring over 80 projects. We offer several no-money-down financing options so that our customers achieve a peace of mind as we manage the entire process to maintain and operate throughout the term.

Generate Revenue and Lower Your Energy Costs

Transform your rooftops, parking lots, carports and land into revenue-generating solar and energy storage facilities while raising revenue and lowering your businesses energy costs.

Set Your Sights on the Sun

PURCHASE

- Federal tax credit
- 5-year MACRS accelerated depreciation
- State and utility rebates
- Reduced energy cost

OPERATING LEASE

- No initial capital outlay with a typical 7- or 10-year lease
- Monetize tax credit and depreciation through bank financing
- State and local rebates
- Reduced energy cost
- Off-balance sheet transaction
- Own system after 7- or 10-year term
- Lease is fully expensed
- Cash flow positive on Day One
- Lease is collateralized by equipment only
- No lien on your building

POWER PURCHASE AGREEMENT

- No money down
- Lower your utility costs by 10 to 30%
- 20-year maintenance, insurance and power generation guarantee
- Turns a variable expense into a fixed line item that can be budgeted and managed

Why Partner with Us?

We are an affiliate of Hanwha Group, a FORTUNE Global 500 company.

Named the Number 1 U.S. Solar Developer by Wood Mackenzie in 2018.

We have decades of solar experience and an extensive U.S. portfolio.

We are a proven success story because of our trusted, longterm relationships.

A Case Study

THE CLIENT

System size: 711 kW DC
 Location: Bronx, New York
 Energy output: 861,600 kW/year
 Installed: September 2014

CHALLENGE

The client operates a large distribution center along the Bronx River in Hunts Point. Looking to lower operational costs, the client hired 174 Power Global to install a rooftop system to reduce the distribution center's electricity costs.

APPROACH

174 Power Global provided turn-key engineering and construction, installing 2,453 solar panels on the building's flat rooftop, generating 711kW in peak power, offsetting more than 700,000 pounds of coal burned each year.

VALUE

The client was able to install this system with 174 Power Global at no upfront cost and pays a rate much lower than what they were paying through the grid. They will continue to save money on electricity costs for 25 years.
