

OUR TOMORROW BEGINS TODAY.

Partner with our resources
and our knowledge
to create a sustainable future.

Real Change Can Happen When We Work Together

174 Power Global moves into tomorrow with the sun in our eyes. Our goal is to create a cleaner and more sustainable future through solar energy.

Based in Irvine, Calif., and an affiliate of the Hanwha Group, we have decades of experience in making solar an affordable solution for our customers and a competitive investment for our partners.

Tomorrow won't look like today. **174 Power Global** is committed to innovating new solutions for a brighter future.

Strategic Partnerships

We work with landowners to provide a win-win situation for land leases, always with a commitment to the environment and sustainability.

Research and Innovation

Keeping ahead of technology to provide a seamless integration towards clean energy

Financial Strength

Proven record of sound financial practices that keeps our company as strong as the sun.

Who is Hanwha?

Hanwha is a FORTUNE Global 500 company and one of Korea's Top 10 business enterprises. As an affiliate of Hanwha Group, Hanwha Energy USA (dba 174 Power Global) offers an integrated solar plant solution from development, financing, engineering, procurement and construction to Independent Power Producer ownership, operation and maintenance. With the experience in solar energy, Hanwha Energy is expanding its energy territory from PV to energy storage and strengthening competence in the energy-storage sector.

174 Power Global's Case Studies

Oberon

In early 2020, 174 Power Global completed the Oberon Solar Facility in Ector County, Texas, on approximately 1200 acres of privately-owned land. Energy from the project is sold into the ERCOT market through an energy hedge agreement with a leading financial institution.

560,000

How many Hanwha Q Cells modules will be installed on the project site

180 megawatts

How much electricity the power plant, which was completed in March 2020, will generate

More than 30,000

How many Texas homes will benefit from that electricity annually

Techren

Located 25 miles southeast of Las Vegas, Techren Solar sized at more than 400MWac is one of the largest fully operational solar facilities in the United States. Contracted under a 25-year Power Purchase Agreement with Nevada Energy, Techren Solar provides clean and competitively priced energy to the greater Las Vegas communities.

Once all phases are fully operational, it will be one of the largest solar photovoltaic facilities in the United States. Located 25 miles southeast of Las Vegas, the Techren Solar I Facility (100 MWac) and Techren Solar II Facility (200 MWac) are photoelectric power plants that will provide energy to Nevada Energy's operating companies under 25-year Power Purchase Agreements.

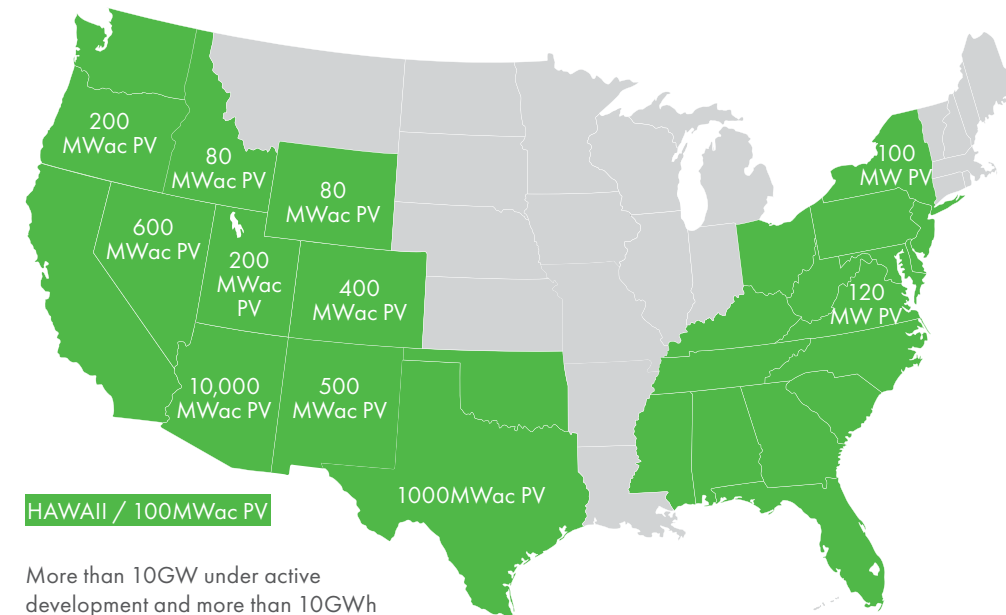

Laguna

The Laguna Solar Generating Facility sits outside Torreón in Coahuila, Mexico. Torreón's population hovers at about 700,000 people and benefits from rich agriculture and industrial businesses. Laguna Solar is a 100MWac solar facility located on land owned by the project.

The Project's Power Purchase Agreement was awarded under Mexico's second long-term auction and the counter-party is Comisión Federal de Electricidad (CFE), the national power company of Mexico.

Laguna Solar is the first of several solar projects fully developed by 174 Power Global in Mexico. With a dedicated in-country Mexico team, 174 Power Global continues to expand into Mexico as an important growth region.

Our operations

HAWAII / 100MWac PV

More than 10GW under active development and more than 10GWh of Energy Storage Solutions

Our Partnerships Across Energy Sectors

Utility-scale solar facilities

Commercial and industrial installations

Retail via Chariot Energy

Our Experience Is the Best

No. 1 Solar Developer by Wood Mackenzie in 2018

Our Financial Strength

Ground Financial Capacity, Green Bond
